Invitation

PM²: Project management in support of CSDP missions and operations

Activity Number 22-23/58 /1

The Hellenic Supreme Joint War College and the Department for International Police Missions of the LAFP NRW, under the aegis of the European Security and Defence (ESDC), are jointly organising a course on the use of the European Commission's Project Management Methodology, namely the PM², in support of CSDP Missions and Operations. The course will take place in Thessaloniki, Greece from 22 to 26 May 2023 (in a residential format).

PM² is a Project Management Methodology developed by the European Commission. Its purpose is to enable Project Managers (PMs) to deliver solutions and benefits to their organisations by effectively managing the entire lifecycle of their project. PM² has been created with the needs of European Union Institutions and projects in mind. However, it is transferrable to projects in any organisation.

This course aims to increase the effectiveness of CSDP missions and crisis management operations by delivering a widely acknowledged methodological framework that manages all the types of projects under its oversight. In addition, it will provide participants with the required knowledge, skills and reference sources to increase their understanding as well as their effective use of PM Methodology in their business life. The aim is to ensure that they are better able to manage their projects. In addition, the course aims to establish an effective reporting pathway between all stakeholders.

In this five-day training course, the critical success factors (CSFs) of PM² will be introduced, giving participants the opportunity to discuss and understand the methodology in practice. Thus, using a fictional project scenario, the participants will have the opportunity to deal with related issues.

The residential course will use a blended learning approach. It will be preceded by an eLearning phase which will provide participants with all the introductory materials, making them familiar with the PM² methodology.

The ESDC is committed to an inclusive, gender-sensitive and discrimination-free environment. Only in an inclusive environment can all people, and therefore the ESDC and its partners, realise their true potential. We therefore particularly encourage applicants who are likely to be underrepresented to apply.

We, therefore, take great pleasure in inviting you to nominate participants for this course. The course provides an excellent opportunity to develop a deeper understanding of the CSDP and to prepare better for any upcoming assignment in a range of CSDP missions and operations.
